

# Gabriel Quaresma

Software developer at **Codeminer42**

Graduation in Systems Analysis and Development and Master's degree in Computer Systems (Research line in distributed systems) from the Federal University of Rio Grande do Norte (UFRN)

**Personal website:** <https://joaogabriel55.github.io>

**E-mail:** [jquaresmasantos98@gmail.com](mailto:jquaresmasantos98@gmail.com)

**LinkedIn:** [gabriel-quaresma-dev](#)

## LANGUAGES

**Portuguese** - Native / **English** - Full professional fluency

## PERSONAL STATEMENT

Web Developer | 5+ Years Experience in Front-End Development

Skilled in building web applications/solutions with React.js and TypeScript, with a strong foundation in Node.js and sometimes I play with Ruby on Rails for back-end. I'm passionate about delivering seamless user experiences and thrive in collaborative team environments. Constantly learning, I stay updated with emerging technologies and best practices to write better code.

## WORK EXPERIENCE

**Software developer at Codeminer42** - *Full Time*

JAN 2021 - PRESENT

As a Front-End Developer, I specialise in React.js to build dynamic user interfaces and contribute to back-end development using Ruby on Rails and Node.js. I organised an internal company workshop on DevOps, covering Containers and CI/CD pipelines. Additionally, I mentor colleagues in front-end development, fostering skill growth and team collaboration.

**Skills:** TypeScript · JavaScript · React.js · Ruby · Ruby on Rails

**Software developer at GoDaddy** - *Contract*

JULY 2022 - PRESENT

Contractor via Codeminer42

I am involved in e-commerce projects that deal with product ordering and shipping. My main area of focus is front-end development, where I use React.js, Next.js (with Typescript), and the Apollo Client to work with GraphQL. On the backend, I used to work with Node.js (with Typescript), GraphQL, and DynamoDB.

**Skills:** TypeScript · GraphQL · Next.js · React.js · Node.js · DynamoDB

---

## **Front-end developer at Grano Capital** - Contract

MAR 2021 - MAY 2022

Contractor via Codeminer42

I developed pre-financing solutions for agriculture, handling sensitive data, payment methods, and GeoJSON. I created map interfaces using Figma, React.js, Mapbox.js, and Ruby on Rails and assisted colleagues in integrating external APIs.

**Skills:** Redux.js · Mapbox · Jest · Ruby on Rails · JavaScript · React.js

## **FIWARE Contributor** - Volunteer

JUN 2019 - DEC 2020

I was tasked with developing new features and writing unit tests for Orion-LD Context Broker using C/C++. Ken Zangelin, a Senior Technical Expert and evangelist, supervised the process.

**Skills:** C++

## **Smart Metropolis project, Universidade Federal do Rio Grande do Norte** - Studentship

MAR 2019 - DEC 2020

I have experience working as a full-stack developer on Smart Cities projects that involve using maps, integrating data, and using FIWARE technologies.

**Skills:** Python · Java · Spring Framework · Vue.js

## **RELEVANT PROJECTS**

### **Personal projects**

**Flow Podcast app**, a simple app for the famous Flow Podcast program with over 100 downloads, allows users to listen to and favourite the episodes. The app was developed using the Flutter framework and consuming the public API of Flow.

**The Invoice** is a lightweight, client-side web application built exclusively with HTML, CSS, and JavaScript. Enables users to quickly create professional-looking invoices, customize details, and export them as PDF for easy sharing. All data is stored locally in the browser using localStorage. No server, cloud dependencies, or external APIs ensure full privacy, offline functionality, and instant accessibility.
